## PRELIMINARY AMENDMENT PURSUANT TO 37 C.F.R. 1.121

Dear Sir:

Please enter the following Preliminary Amendment in the above identified patent application filed herewith before calculating claim fees. This application is filed as a 37 C.F.R. § 1.53(b) divisional of co-pending U.S. Application No. 08/930,455, filed January 12, 1998 which is a National Phase filing under 35 U.S.C. §371 of PCT Application PCT/US96/04104, filed March 26, 1996, which is a continuation-in-part of U.S. Application No. 08/410,807, filed March 27, 1995, which is a continuation-in-part of U.S. Application No. 08/115,161, filed September 1, 1993. Claims pending in this application after entry of this Amendment are provided in Appendix I for the Examiner's convenience.

## IN THE SPECIFICATION

At page 1, please delete lines 4-6 and substitute therefor the following:

--This non-provisional application is filed under 37 C.F.R. § 1.53(b) as a divisional of co-pending U.S. Application No. 08/930,455, filed January 12, 1998 which is a National Phase filing under 35 U.S.C. §371 of PCT Application PCT/US96/04104, filed March 26, 1996, which is a continuation-in-part of U.S. Application No. 08/410,807, now U.S. Patent No. 5,723,291 filed March 27, 1995, which is a continuation-in-part of now abandoned U.S.

698955 v1

Application No. 08/115,161, filed September 1, 1993 all of which are incorporated herein by reference in their entirety for all purposes.--

### **IN THE CLAIMS**

Please cancel claims 27-29 without prejudice. Please amend claims 2-12, 14-17, 19-22 and 24-26 as follows:

Claims 2-6, 8, 10, and 12, line 1, respectively, please delete "(a)" and substitute therefor --1--.

Claim 7, please delete "claim 5" and substitute therefor --claim 6--.

Claim 9, please delete "claim 7" and substitute therefor --claim 8--.

Claim 11, please delete "claim 9" and substitute therefor --claim 10--.

Claims 14-17, line 1, respectively, delete "claim 12" and substitute therefor --claim 13--.

Claims 19-22, line 1, respectively, delete "claim 17" and substitute therefor --claim 18--.

Claims 24-26, line 1, respectively, delete "claim 22" and substitute therefor --claim 23--.

#### **REMARKS**

#### Status

Claims 1-29 are pending in this application, no claims being added, claims 2-12, 14-17, 19-22 and 24-26 being amended and claims 27-29 are canceled herewith. The parent application was subject to a restriction requirement (Paper Number 9, mailed March 8, 1999) and Applicants initially elected to prosecute Claim Group VII (original claims 27-29) with traverse. Claims 1-26 are pending in this application and represent the non-elected claims from the previous restriction requirement. Claims 2-6, 8, 10 and 12 are amended to correct formal deficiencies and claims 7, 9, 11, 14-17, 19-22, and 24-26 are amended to correct claim dependencies. This Amendment introduces no new matter.

#### APPENDIX I

## **CLAIMS PENDING AS OF DECEMBER 4, 2000**

- 1. A method for screening a test compound for the ability to activate transcription through an indirect estrogen response, the method comprising:
- a) providing a cell comprising an estrogen receptor and a promoter comprising an AP1 site which regulates expression of a reporter gene;
  - b) contacting the cell with the test compound; and
  - c) detecting the expression of the reporter gene.
  - 2. (Amended) A method of claim 1, wherein the cell is an Ishikawa cell.
- 3. (Amended) A method of claim 1, wherein the cell over-expresses the estrogen receptor.
- 4. (Amended) The method of claim 1, wherein the promoter is genetically engineered to comprise an AP1 site.
- 5. (Amended) The method of claim 1, wherein the test compound is known to have antiestrogenic activity.
- 6. (Amended) The method of claim 1, wherein the cell is derived from uterine tissue.
- 7. (Amended) The method of claim 6, wherein the cell is a HeLa cell or an Ishikawa cell.
  - 8. (Amended) A method of claim 1, further comprising the steps of:
- a) providing a second cell comprising an estrogen receptor and a promoter comprising a standard estrogen response element which regulates expression of a second reporter gene;
  - b) contacting the second cell with the test compound; and

LAW OFFICES OF SKJERVEN MORRILL MACPHERSON LLP

- c) detecting the expression of the second reporter gene.
- 9. (Amended) A method of claim 8, wherein the response element is from the *Xenopus* vitellogenin A2 gene.
- 10. (Amended) A method of claim 1, wherein the cell further comprises a promoter comprising a standard estrogen response element which regulates expression of second reporter gene.
- 11. (Amended) A method of claim 10, wherein the response element is from the *Xenopus* vitellogenin A2 gene.
  - 12. (Amended) An estrogen agonist identified by the method of claim 1.
- 13. A method for screening a test compound for the ability to inhibit transcription through an indirect estrogen response, the method comprising:
- a) providing a cell comprising an estrogen receptor and a promoter comprising an AP1 site which regulates expression of a reporter gene;
- b) contacting the cell with the test compound an a compound known to mediate an indirect estrogen response;
  - c) detecting the expression of the reporter gene.
- 14. (Amended) The method of claim 13, wherein the compound is known to mediate an indirect estrogen response is tamoxifen.
- 15. (Amended) A method of claim 13, wherein the cell over-expresses the estrogen receptor.
- 16. (Amended) The method of claim 13, wherein the promoter is genetically engineered to comprise an AP1 site.
  - 17. (Amended) A compound identified by the method of claim 13.
- 18. A method for screening a test environmental compound for estrogenic activity, the method comprising:

LAW OFFICES OF SKJERVEN MORRILL MACPHERSON LLP

- a) providing a cell comprising an estrogen receptor and a promoter comprising an estrogen response element which regulates the expression of a reporter gene;
  - b) contacting the cell with the test compound; and
  - c) detecting the expression of the reporter gene.
- 19. (Amended) The method of claim 18, wherein the cell further comprises a promoter comprising an AP1 site which regulates expression of a second reporter gene.
  - 20. (Amended) The method of claim 18, wherein the reporter gene is CAT.
- 21. (Amended) The method of claim 18, wherein the cell over-expresses the estrogen receptor.
  - 22. (Amended) The method of claim 18, wherein the cell is an ERC1 cell.
- 23. A method of inhibiting agonistic activity of an antiestrogen compound, said method comprising administering with said antiestrogen compound an inhibitor selected from the group consisting of genistein, staurosporine, 6-thioguanine, and 2 aminopurine.
- 24. (Amended) The method of claim 23, wherein said inhibiting agonistic activity comprises inhibiting an indirect estrogen response.
- 25. (Amended) The method of claim 23, wherein said antiestrogen compound is tamoxifen.
  - 26. (Amended) The method of claim 23, wherein said inhibition is in vivo.
